

CONTENTS OF VOLUME 31

Number 1

Published 16 October 1996

- S. Hering, A. Eldering
and J. H. Seinfeld 1 Bimodal character of accumulation mode aerosol mass distributions in Southern California
- C. R. Johnston and D. J. Wilson 13 A vortex pair model for plume downwash into stack wakes
- E. J. Dlugokencky, K. A. Masarie,
P. P. Tans, T. J. Conway
and X. Xiong 21 Is the amplitude of the methane seasonal cycle changing?
- R. Simonaitis, J. F. Meagher
and E. M. Bailey 27 Evaluation of the condensed carbon bond (CB-IV) mechanism against smog chamber data at low VOC and NO_x concentrations
- R. L. Petersen 45 A wind tunnel evaluation of methods for estimating surface roughness length at industrial facilities
- J.-S. Lin and L. M. Hildemann 59 A generalized mathematical scheme to analytically solve the atmospheric diffusion equation with dry deposition
- C. D. O'Dowd, M. H. Smith,
I. E. Consterdine and J. A. Lowe 73 Marine aerosol, sea-salt, and the marine sulphur cycle: a short review
- M. E. Jenkin, S. M. Saunders
and M. J. Pilling 81 The tropospheric degradation of volatile organic compounds: a protocol for mechanism development
- M. P. Singh, R. T. McNider,
R. Meyers and S. Gupta 105 Nocturnal wind structure over land and dispersion of pollutants: an analytical study
- Short Communication*
D. Spänkuch and E. Schulz 117 On short-term total-column-ozone-forecast errors
- News and Opinions*
- Introduction 121
- Calendar 121
- Forthcoming Papers i
- Preparation of Papers iii

Number 2

Published October 23 1996

- G. A. Keating, T. E. McKone
and J. W. Gillett 123 Measured and estimated air concentrations of chloroform in showers: effects of water temperature and aerosols

M. Z. Jacobson

H. Kunimi, S. Ishizawa
and Y. Yoshikawa

C. Reimann, P. de Caritat,
J. H. Halleraker, T. Volden,
M. Äyräs, H. Niskavaara,
V. A. Chekushin and V. A. Pavlov

J. L. Battarbee, N. L. Rose
and X. Long

M. J. Brown, S. Pal Arya
and W. H. Snyder

A. G. Allen, A. L. Dick
and B. M. Davison

M. R. Williams, T. R. Fisher
and J. M. Melack

C. D. Soontjens, K. Holmberg,
R. N. Westerholm and J. J. Rafter

M. Zheng, T. S. M. Wan, M. Fang
and F. Wang

L. Cheng, L. Fu, R. P. Angle
and H. S. Sandhu

P. Ebert, K. Baechmann, G. Frank
and J. Tschiersch

G. Gangoiti, J. Sancho, G. Ibarra,
L. Alonso, J. A. García, M. Navazo,
N. Durana and J. L. Ilardia

M. J. Clifford, R. Clarke
and S. B. Riffat

Technical Note

I. J. Beyerland, S. L. Scott,
D. H. Ó'Neill, J. B. Moncrieff
and K. J. Hargreaves

Short Communications

A. Calogirou, D. Kotzias
and A. Kettrup

S. Fuzzi, P. Mandrioli
and A. Perfetto

131 Development and application of a new air pollution modeling system—II. Aerosol module structure and design

145 Three-dimensional air quality simulation study on low-emission vehicles in Southern California

159 Rainwater composition in eight arctic catchments in northern Europe (Finland, Norway and Russia)

171 A continuous, high resolution record of urban airborne particulates suitable for retrospective microscopical analysis

183 Plume descriptors derived from a non-Gaussian concentration model

191 Sources of atmospheric methanesulphonate, non-sea-salt sulphate, nitrate and related species over the temperate South Pacific

207 Chemical composition and deposition of rain in the central Amazon, Brazil

219 Characterisation of polycyclic aromatic compounds in diesel exhaust particulate extract responsible for aryl hydrocarbon receptor activity

227 Characterization of the non-volatile organic compounds in the aerosols of Hong Kong—identification, abundance and origin

239 Seasonal variations of volatile organic compounds in Edmonton, Alberta

247 The chemical content of raindrops as a function of drop radius, part III: a new method to measure the mean aerosol particle size of different inorganic species in the atmosphere

253 Rise of moist plumes from tall stacks in turbulent and stratified atmospheres

271 Local aspects of vehicular pollution

277 Simple battery powered device for flux measurements by conditional sampling

283 Product analysis of the gas-phase reaction of β -caryophyllene with ozone

287 Fog droplets—an atmospheric source of secondary biological aerosol particles

and the other two were not. This was the case for all three groups of subjects.

However, when the subjects were asked to indicate which of the two pairs of words they had seen in the first part of the experiment, they tended to choose the pair of words which had been presented earlier.

Thus, the results of the present experiments suggest that the subjects' memory for the words was better for those words which had been presented earlier than for those words which had been presented later.

It is interesting to note that the results of the present experiments are similar to those of the experiments of Kinsbourne and Warrington (1963).

Thus, it appears that the results of the present experiments support the hypothesis that the subjects' memory for the words was better for those words which had been presented earlier than for those words which had been presented later.

However, it is also possible that the results of the present experiments are due to the fact that the subjects' memory for the words was better for those words which had been presented earlier than for those words which had been presented later.

Thus, the results of the present experiments suggest that the subjects' memory for the words was better for those words which had been presented earlier than for those words which had been presented later.
